

Ejercicio resuelto

Simplificar la fracción  $\frac{12}{18}$ .

$$\frac{12}{18} \xrightarrow{\div 2} \frac{6}{9} \xrightarrow{\div 3} \frac{2}{3}$$

3. Simplifica siguiendo las instrucciones.

$$\frac{4}{8} \xrightarrow{\div 2} \frac{2}{4} \xrightarrow{\div 2} \frac{1}{2}$$

$$\frac{9}{18} \xrightarrow{\div 3} \frac{3}{6} \xrightarrow{\div 3} \frac{1}{2}$$

$$\frac{12}{30} \xrightarrow{\div 2} \frac{6}{15} \xrightarrow{\div 3} \frac{2}{5}$$

$$\frac{30}{45} \xrightarrow{\div 3} \frac{10}{15} \xrightarrow{\div 5} \frac{2}{3}$$

4. Simplifica hasta encontrar la fracción irreducible.

$$\frac{10}{20} =$$

$$\frac{12}{20} =$$

$$\frac{15}{30} =$$

$$\frac{8}{60} =$$

$$\frac{18}{24} =$$

$$\frac{12}{36} =$$

$$\frac{30}{60} =$$

$$\frac{16}{160} =$$
